Program Helps Job Seekers

Nanaimo, BC – Starting October 26, a four week program in Nanaimo offers job seekers support, tools and a fresh approach to finding work. The free program, called ‘Experience Works’, is aimed at helping workers over the age of 45 investigate new careers, learn about the local labour market, network with local employers and sharpen their resume and interview skills.

“We’ve had over one thousand people successfully complete our program,” says Theresa Mayoh, Executive Director. “It brings people together from diverse backgrounds and definitely helps break the isolation that comes with searching for a job.”

A new program starts each month, but space is limited. Participants can be on employment insurance, but it is not a requirement. This program is open to individuals in the central island, from Duncan to Qualicum.

“I’m new to Nanaimo and joining the program helped me meet new people, get specific information about local industries, and tap into job prospects,” says Jenny de Haas. Jenny had a job within weeks of completing the program. People change jobs for different reasons. Some are re-entering the workforce after taking time off to focus on family priorities, some are seeking a complete career change but need help researching options. In this economy, some people have faced downsizing and want to find a similar job in the same industry. Whatever, the reason, this excellent resource can provide information to make the job search process more realistic and effective.

For additional information on the Experience Works program, call 250-714-0471.

About Ethos:
